

## Customer quotation document

## **International Freight Forwarding Specialist**

Assessment method: Practical assessment (Ocean Freight) Task 1

| Shipment requirements          |                      |       |
|--------------------------------|----------------------|-------|
|                                | FCL                  | LCL   |
| Departure Port                 |                      |       |
| Port of Arrival                |                      |       |
| Commodity                      |                      |       |
| Quantity                       |                      |       |
| Total Shipment Value           |                      |       |
| Shipment net weight            |                      |       |
| Shipment gross weight          |                      |       |
| Unit dimensions                |                      |       |
| Insurance                      |                      |       |
|                                | Special Instructions |       |
|                                |                      |       |
| Selection of Services          | Costs                | Costs |
| (to be detailed by Apprentice) | FCL                  | LCL   |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
|                                |                      |       |
| Total Cost GBP                 |                      |       |
| Total Cost CAD                 |                      |       |

| Any additional recommendations, advisories, timescales and factors to consider to meet the customer requests. |
|---|
|   |
|   |
|   |
|   |
| Justify the recommendations for the Ocean freight pricing and calculations, taking into account risk.         |
|   |
